2002 Packager Merit Awards—
Surpassed 100,000 hours

Receiver of the
"Chlorine Institute Plant Safety Award for 2001"

Year established in Tacoma: 1974

Product Produced and Repackaged at this Facility:

Sodium Hypochlorite, Chlorine, Caustic Soda and Anhydrous Ammonia.

Other Products Available:

A full line of chemicals for industrial, water, and waste water are also available. Click here for a [full listing of our products](#).

Geographic area supplied to:

The JCI Tacoma branch supplies product to the states of Washington, Oregon, Alaska, Idaho and Montana.

Branch Location: The JCI Tacoma facility is located in a very strategic location that enables the branch to ship from either the Port of Seattle or the Port of Tacoma. These ports open up major off shore markets for the branch.

Product Stewardship: At JCI, we believe we are the best in the business, and everyday we look forward to showing our customers why we believe this is true. The JCI Tacoma branch diligently focuses on product quality, customer satisfaction, strict codes of conduct, production regulations and specifications and environmental standards which are strictly adhered to. ([more about product stewardship](#))

Other Branch Strengths: The Branch has a very productive blend of dedicated long term employees and persons with great skill and progressive ideas. JCI Tacoma is also proud of its unique inhabitants. Present and living within the facility grounds are several resident geese and a family of Sea Otters, who frequently are seen feeding at the large koi pond located on the plant grounds. We are happy to support and encourage this kind of synergy between chemical production and nature's "special visitors".

To Place Orders Call:
Toll free at 800.932.0160.

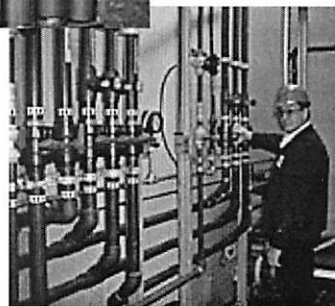

To reach JCI, Tacoma:

Calls regarding deliveries and general inquiries may be made to 800.364.2944. Sales inquiries may be made to [Scott Donahoe, VP Sales, Western Region](#).
or Call CHEMTREC 24 hours at 800.424.9300.

JCI Receives Chlorine Institute Plant Safety Awards for 2002

JCI Jones Chemicals is pleased to receive "Chlorine Institute Plant Safety Awards" for 2002 at the following facility locations:

- Beech Grove, Indiana - 100,000 hour award
- Ft. Lauderdale, Florida - 50,000 hour award
- Jacksonville, Florida - 100,000 hour award
- Tacoma, Washington - 100,000 hour award
- Torrance, California - 250,000 hour award
- Warwick, New York - 50,000 hour award

Under the Chlorine Institute's criteria, if any of the following four events occur during a calendar year, a plant is disqualified from receiving an award:

1. Exceeding the RQ (reportable quantity) for the release of any chemical.
2. An accidental death on-site or off-site but caused by an on-site event, or an accidental death caused by the transportation of chemicals.
3. Any evacuation of the surrounding neighborhood caused by the release of any chemical from the facility.
4. Any Lost Workday incidents at the facility during the year.

Facilities will win an award when they reach specific levels based on work-hours worked at the plant. The award levels are 50K hours, 100K hours, 250K hours, 500K hours, 750K hours, 1M hours, and higher.

JCI Receives Chlorine Institute Plant Safety Awards for 2001

JCI Jones Chemicals is pleased to receive "Chlorine Institute Plant Safety Awards" for 2001 at the following facility locations:

- Barberton, Ohio - 50,000 hour award
- Beech Grove, Indiana - 100,000 hour award
- Jacksonville, Florida - 50,000 hour award
- Milford, Virginia - 50,000 hour award
- Tacoma, Washington - 50,000 hour award
- Torrance, California - 100,000 hour award

2001 Safety, Environmental Performance Awards Presented

The Institute's annual Awards Luncheon was held March 12th during the Annual Meeting in Dallas, Texas. Art Dungan, Vice President of Safety, Health and Environment, announced the production facilities in the U.S. and Canada that earned the Plant Operations and Safety Committee's safety awards for surpassing various levels of work hours without any OSHA-recordable injuries or illnesses. All award-winning facilities are listed below.

Dungan also announced the facilities that have had no release of the Institute's mission chemicals for at least one calendar year. The Environment and Health Committee's Environmental Performance Award recognizes facilities for this emission-free performance back as far as 1998 (the base year for this award). There were nine (9) awards presented to facilities that have operated for four years without a release.

Gary Trojak, Vice President of Packaging and Technical Services, presented the Packaging Committee's Merit Award for Safety to 20 packaging facilities that reached an award level in 2001. The Packager's award program recognizes sites that have at least 50,000 work hours without a disqualifying event in a calendar year. Other current award levels are 100,000 hours, and 250,000 hours.

The award plaques and certificates were presented by Steve Fitzgerald of Occidental Chemical, Vice Chair of the Board of Directors (at that time) who was standing in for Board Chair John Heilala of Vulcan Chemicals who was unable to attend the annual meeting.

SAFEST PRODUCTION FACILITIES - Flanked by Steve Fitzgerald, Board Vice Chair, right, and Bob Smerko, President of the Institute, left, are representatives of the CI member companies that had facilities with no OSHA-recordable injuries or illnesses in 2001. The companies represented are: Occidental Chemical Corporation; Vulcan Materials Company; Formosa Plastics Corporation, USA; Pioneer; General Electric Company; Olin Corporation; St. Anne Chemical Company, Ltd.; and Vicksburg Chemical Company.

Producer Safety Awards for 2001

CHAIRMAN'S AWARD

Category 2 (Plants with 100 or more employees)

Occidental Chemical Corporation	Convent, Louisiana	(Level III, over <u>three million</u> hours)
Vulcan Materials Company	Wichita, Kansas	(Level I, over <u>one million</u> hours)

Category 1 (Plants with fewer than 100 employees)

Vulcan Materials Company	Port Edwards, Wisconsin	(Level IX, over <u>4.5 million</u> hours)
--------------------------	-------------------------	---

HONOR AWARD

Category 2 (Plants with 100 or more employees)

Formosa Plastics Corporation, USA	Point Comfort, Texas
Occidental Chemical Corporation	Niagara Falls, New York
Occidental Chemical Corporation	Muscle Shoals, Alabama
Pioneer	Becancour, Quebec

Category 1 (Plants with fewer than 100 employees)

General Electric Company	Burkville, Alabama
Occidental Chemical Corporation	Mobile, Alabama
Olin Corporation	Augusta, Georgia
St. Anne Chemical Company, Ltd.	Nackawic, New Brunswick
Vulcan Materials Company	Port Edwards, Wisconsin

CONTINUED EXCELLENCE

Category 2 (Plants with 100 or more employees)

Vicksburg Chemical Company	<i>Level II</i>	Vicksburg, Mississippi
Occidental Chemical Corporation	<i>Level II</i>	Houston (Battleground), Texas
Olin Corporation	<i>Level I</i>	McIntosh, Alabama

Category 1 (Plants with fewer than 100 employees)

Occidental Chemical Corporation	<i>Level II</i>	Mobile, Alabama
General Electric Company	<i>Level I</i>	Burkville, Alabama
Olin Corporation	<i>Level I</i>	Augusta, Georgia

ENVIRONMENTAL PERFORMANCE EXCELLENCE

These individuals represent CI member company production facilities that have had no reportable quantity (RQ) releases of the Institute's mission chemicals in the past one-to-four years. The facilities are listed below.

ENVIRONMENTAL PERFORMANCE RECOGNITION PROGRAM

Four Years with No Reportable Quantity Releases of Mission Chemicals

Certificate Award

Bayer Corporation
Formosa Plastics Corporation, USA
Nexen, Inc.
Occidental Chemical Corporation
Occidental Chemical Corporation
Oxy Vinyls LP
Olin Corporation
Olin Corporation
Olin Corporation

Baytown, Texas
Point Comfort, Texas
North Vancouver, British Columbia
Mobile, Alabama
Muscle Shoals, Alabama
Houston (Battleground), Texas
McIntosh, Alabama
Augusta, Georgia
Niagara Falls, New York

Three Years with No Reportable Quantity Releases of Mission Chemicals

Certificate Award

General Electric Company
OxyVinyls LP

Burkville, Alabama
Houston (Deer Park), Texas

Two Years with No Reportable Quantity Releases of Mission Chemicals

Certificate Award

Occidental Chemical Corporation
Occidental Chemical Corporation
Pioneer
PPG Canada, Inc.
Sterling Pulp Chemicals

Hahnville, Louisiana
Niagara Falls, New York
Henderson, Nevada
Beauharnois, Quebec
Saskatoon, Saskatchewan

One Year with No Reportable Quantity Releases of Mission Chemicals

Recognition

Dow Chemical North America
E.I. duPont de Nemours & Company, Inc.
Occidental Chemical Corporation
Occidental Chemical Corporation
Pioneer
St. Anne Chemical Company, Ltd.
Vicksburg Chemical company
Vulcan Materials Company

Fort Saskatchewan, Alberta
Niagara Falls, New York
Convent, Louisiana
Ingleside, Texas
St. Gabriel, Louisiana
Nackawic, New Brunswick
Vicksburg, Mississippi
Port Edwards, Wisconsin

PACKAGERS HONORED FOR PERFORMANCE-- The facilities listed below were honored at the 2002 Annual Awards Luncheon for no disqualifying events for specific numbers of work hours up through the end of 2001. The Packager member representatives to the right accepted the awards from Steve Fitzgerald and Bob Smerko, left.

2001 PACKAGER MERIT AWARDS

Company	Plant Location	Award Level
